Why Gelcide Essentials

Essential oils that adhere to the mucosa for use in the oral cavity

- Inflammation disappears and pockets become smaller!
- Visible and tangible success for both patient and doctor!
- Lasting feeling of freshness !
- Application once or twice a year is enough!
- Ready-to-use solution, particularly quick handling ! The clou... bag closed!
- Applied as a liquid, GELCIDE products seals every corner of cleaned gum pockets in a matter of seconds
- Significant improvement often within 24 hours with a lasting feeling of freshness
- After 12 to 25 days the protective film has dissolved, securely sealed the bag was able to heal protected

Film-forming proven, patented combination of medicinal resins

- 23 Anti-inflammatory essential oils including: thyme, tea tree, camphor, ylang-ylang…….

Indications:

- Treatment of periodontal pockets
- Periodontitis prophylaxis
- Protection of oral mucosal lesions
